

CAS Trac is versatile and easy to use. CAS Trac's STANDARD label formats include data that has been proven through years of industry experience to be both useful and customer demanded. Due to CAS Trac's abundance of on-board memory, multiple label formats are commonly stored in individual CAS Trac controllers, providing maximum flexibility to meet multiple product, labeling, and data management needs.

The basis for many of the STANDARD labels supplied by CAS Trac is the Global Trade Item Number. The Global Trade Item Number (GTIN) is used as a unique identifier of goods and services throughout the world. GTIN-14 is an identifier used in bar code and RFID symbologies that embodies COMPANY PREFIX and ITEM REFERENCE to fixed content shipping containers. This label format is internationally supported and currently recognized by common industry users as the accepted wholesale international standard for communicating COMPANY and ITEM (product) identifying data. Please refer to the CAS sample STANDARD label formats when considering your system needs.

CAS Trac insures operator ease, effective communication, and the peace of mind that comes with product traceability. Please use this template to help design label formats that provide your application with the functionality and versatility to meet your application's total needs!

Standard CAS Trac Label Templates

Sample Label 1: 4" x 3" STANDARD BOX / CASE LABEL including (1) graphic, i.e. USDA Bug.

Data commonly included in this CAS Standard label format

Item Number	Piece Count (if applicable)
Weight	Description
Serial Number	Ingredients (if applicable)
Pack Date	Barcode
Date Offsets	Signature (Distributed by)
Date Code	Qualifiers (i.e. Keep Refrigerated)
Lot Number	One (1) image field (i.e. USDA
Batch Number	Bug, Company Logo)

Sample Label 2:

4" x 3" Advanced Box / Case Label

Data included in this CAS standard label format is basically the same as found in the standard box/case label except it includes the addition of a second image field (i.e. USDA Bug, Company Logo)

Item Number	Piece Count (if applicable)
Weight	Description
Serial Number	Ingredients (if applicable)
Pack Date	Barcode
Date Offsets	Signature (Distributed by)
Date Code	Qualifiers (i.e. Keep Refrigerated)
Lot Number	Two (2) image fields (i.e. USDA Bug, Company Logo)
Batch Number	

Sample Label 3: 4" x 3" Piece Label

Data included in this CAS standard label format is the same as the standard box/case label except there is no piece serial number. This label is typically used to pack pieces into a master box which can also be palletized. The individual piece weighments are tied into the master box by CAS TRAC which includes individual box data in the total pallet label data.

Item Number	Lot Number
Weight	Batch Number
Pack Date	Piece Count (if applicable)
Date Offsets	Description
Date Code	Ingredients (if applicable)

Sample Label 4: 4" x 3"

Combination GTIN-14 & Retail Label

Both a GTIN label format and retail label format. It is designed to allow the producer to enter product in and out of inventory while also allowing the seller to identify the product via a second U.P.C. retail bar code label to meet POS needs. Note: This label format includes a safe handling statement.

Other Label Samples

Sample Label 6: 4" x 3"
"Rainbow" (Multi-Product) / Box Label

This standard or advanced box label format typically includes multiple product information that is printed on a single label. It is often generated by scanning previously bar coded product as it is placed into a master case.

Sample Label 7: 4" x 3"
PTI (Produce Traceability Initiative) Label

This label format is designed for case level tracking and meets voluntary initiatives for the US produce industry including GTIN brand owner, batch/lot, and PTI voice pick code data.
