## 🚈 3. Troubleshooting

If the changes are not visible on your label, check that you adjusted the text and make sure field items aren't overlaping excessivly. If there is still no effect, check the following PARAMETER.

From the Parameter Setting menu, enter 758 and ensure it is set to Y.

\*Note: Variable lengths are only for Continuous Label Mode and 'should' auto switch on/off this paramater when changing modes.

If you are still having issues after checking the parameter menu, reach out to your local dealer. If you dont have a dealer, please reach out to us directly. E-mail your details to: <u>sales@cas-usa.com</u>. Thank you!
